Project portfolio

Aung Ko Oo | Backend Developer

Log Monitoring Dashboard

A responsive dashboard and separate API for managing projects and application logs. Includes search and level/time filters, metadata inspection, and CSV export.

React, TypeScript, Express, Prisma, PostgreSQL

Expense Tracker

An offline-first Android app for accounts, income, expenses, and spending reports. Keeps data on the device and supports versioned JSON backup and restore.

React Native, Expo, TypeScript, Zustand, AsyncStorage

PulseMap - Live Location Tracker

Live GPS sharing with authenticated accounts, real-time map updates, nearby location queries, and road directions. Uses PostGIS geography points for location data.

React, Express, Socket.IO, PostgreSQL/PostGIS, Leaflet

Todo + AI Suggestion

A modular todo application with AI-assisted task suggestions, typed APIs, and a containerized development setup.

NestJS, React, TypeScript, Docker, RESTful API

NestJS Microservices

A workspace of independent services using typed messaging, relational data, authentication, and queue workers.

NestJS, TypeScript, Prisma, PostgreSQL, RabbitMQ, JWT

Real-Time Point of Sale (POS-TS)

A point-of-sale application with a sales checkout flow and inventory adjustments after completed transactions.

Node.js, React, TypeScript, RESTful API

Inventory Management System

An inventory application with role-based access for Admin, Manager, and Staff, stock and product-variant tracking, and audit logs.

Laravel, React, MySQL, Render

Reactive Dynamic POS App

A point-of-sale application built with Laravel Livewire, with a checkout interface that updates without full-page reloads.

Laravel, Livewire, MySQL

Recipe & Content Discovery Platform

A content discovery interface integrating external REST APIs, with instant search and filtering and client-side page transitions.

React, Node.js, RESTful API
