PROFILE

Detail-oriented and results-driven **Full-Stack Developer** with hands-on experience in building scalable web applications and RESTful APIs. Proficient in **TypeScript, React, PHP (Laravel), Node.js (NestJS)**, and containerization using **Docker**. Strong understanding of MVC architecture, clean code practices, and relational database management. Adept at translating business requirements into clean, maintainable, and high-performance code.

PROFESSIONAL EXPERIENCE

OJT Training, *BIB Training Center* 2024 – 05/2024 | Yangon, Myanmar

- Gained hands-on experience in professional software development lifecycles.
- Collaborated with senior developers to understand backend architecture and system deployment.

EDUCATION

Government Technical Institute (Pyin Oo Lwin) Pyin Oo Lwin, Myanmar
Coursework in Mechanical Engineering (2018)

SKILLS

- Languages & Core: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3
- Databases: MySQL, PostgreSQL
- Frontend: React, Blade, Tailwind CSS, Livewire
- DevOps & Tools: Docker, Git/GitHub, Linux (Ubuntu/Debian), Render, Nginx
- Backend: Node.js, NestJS, Laravel, Express.js, RESTful APIs

CERTIFICATES

- Professional Web Design — Code Lab
- Laravel + Vue.js Fullstack Course — Code Lab
- Ninja HR — Web Programming Channel
- Fullstack Developer Course — Code Lab

PROJECTS EXPERIENCES

Recipe & Content Discovery Platform , *Tech Stack: React, Node.js, RESTful API*

- **Why this Stack?** Utilized **React** for client-side state rendering to deliver immediate search filtering and seamless page transitions.
- **Web Features & Business Value:**
- Dynamic REST API integration pulling and rendering external data dynamically.
- Instant search and filtering capabilities suitable for dynamic product or content catalogs.

Reactive Dynamic POS App , *Tech Stack: Laravel, Livewire, MySQL*

- **Why this Stack?** Leveraged **Laravel Livewire** to build a single-page app (SPA) experience directly in PHP without adding frontend JavaScript framework overhead.
- **Web Features & Business Value:**
- Zero page-reload checkout interface for cashiers, increasing speed and user productivity.
- Lightweight architecture reducing client-side resource usage on older hardware.

Ai Todo list , *Tech Stack: NestJS, React, TypeScript, Docker, RESTful API*

- **Why this Stack?** Selected **NestJS + TypeScript** for enterprise-grade type safety and modular architecture in large codebases. Integrated **Docker** to guarantee environment consistency across development and production deployments.
- **Web Features & Business Value:**
- Fully containerized setup enabling fast, failure-free cloud deployments.
- End-to-end type safety reducing runtime bugs and frontend-backend data mismatch.
- Real-time task tracking interface designed to streamline team workflows.

Inventory Management System , *Tech Stack: Laravel (PHP), React, MySQL, Render*

- **Why this Stack?** Combined **Laravel's Eloquent ORM** with **MYSQL** to handle complex relational data queries and high-volume transactions securely.
- **Web Features & Business Value:**
- **Role-Based Access Control (RBAC):** Strict security layers separating Admin, Manager, and Staff permissions.
- Real-time tracking of stock levels, product variants, and audit logs to prevent inventory leakage.
- Deployed on **Render** with isolated production environment variables for high uptime.

Real-Time Point of Sale (POS) System , *Tech Stack: Node.js, React, TypeScript, RESTful API*

- **Why this Stack?** Built on **Node.js** for asynchronous, non-blocking I/O execution, ensuring sub-second response times during peak checkout hours.
- **Web Features & Business Value:**
- High-speed sales checkout flow reducing customer waiting time at counter terminals.
- Automated instant inventory adjustment upon transaction completion to maintain stock accuracy.
